CHAIN FEEDER FLATLINE 476

SKA chain feeding system FLATLINE is an extremely popular solution for breeder systems due to its simplicity, reliability, robustness and flexibility

Hardened steel chain and corner components and hot dip galvanized structures make it a long-lasting choice.

Easy to assemble it provides immediate verification and solution of issues. Fast feed distribution guaranteed.

MALE FEEDER LYRA G

LYRA-G pan feeder allows with only one single centralized adjustment to feed birds from day-olds to adults

High feed cone and low pan guarantee easy access to feed. The double-rim increases greatly feed recovery.

Quick disassembly of components. Smooth surfaces do not get feed trapped. 100% pure polypropylene.

NIPPLE DRINKERS

"Top nipple" drinkers. Installed on a squared pipe, nipples are placed at a chosen distance. The ideal solution for breeding farms.

The drinkers are equipped with poly-directional nipples. Water flows only when these are activated making it cleaner and fresher for the birds.

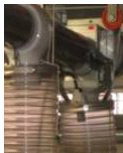

The entire drinking line can be lifted with manual winches. Drip cups can be implemented to reduce wet litter and adding comfort to the birds.

CROSS AUGER SPIRALINE

SPIRALINE transports feed directly from the silos by means of an inlet tube or a boot fitted with a shut off slide to the line hoppers.

With a wide choice of motors, direct drive and belt drives, the units are adaptable to every need. A safety micro-switch is fitted.

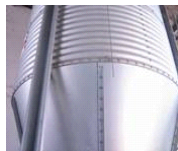

A large range of drops complete the SPIRALINE system making it suitable for installation in every type of farm.

METAL SILO FED BIN

Made of galvanized sheet metal, the silos provide a durable solution for stocking feed.

Silos include ladder with safety cage and cover opening from the ground

Available from 4 to 22 tonnes (1 to 6 rings), 4 or 6 legs.

OFFER N. MAAB151214A
Chain+panAMC Engineering
Lalitpur
Nepal

For the equipment of a house having the following characteristics:

HOUSE LENGTH	m	54.00		
HOUSE WIDTH	m	12.00		
FARMING SURFACE	sqm	648		
FARMING TYPE			BROILER BREEDERS	
Q.TY OF FEMALES	nr	3,500		5.40 density of females
Q.TY OF MALES	nr	350		
FEEDING TYPE			CHAIN FEEDING	PRODUCTION Farming type
NUMBER OF CIRCUITS SUSPENDED	nr	3		ELEC. DAILY Lifting system type
SPEED	m/min	19		
HOPPER PER CIRCUIT	nr	1		150 Hopper capacity (Kg)
TROUGH SPACE	cm/hen	19		
TYPE OF GRILL	mm	44.5		6 wires
ELECTRICAL SPECIFICATIONS	type	400V		50Hz
ELECTRICAL PANEL			COMPLETE	
FEMALE LINE WEIGHTING	type		LOAD CELLS	
CROSS AUGER SPIRALINE D.125	nr	1		17.00 Length cross auger (m.)
SILO	nr	1		5 capacity (in days)
SILO CAPACITY	tonnes	(S) 8,7		2.63 recommended q.ty for 5 days
MALE FEEDING LINES PER HOUSE	nr	2		MANUAL Lifting system type
MALE FEEDING PANS	type	LYRA G		7.00 males/pan
PANS/ELEMENT 3M	nr	1.5		50 total pans
MALE FEEDING LINES WEIGHTING	type	MANUAL		
DRINKING LINES	nr	2		7.5 birds/nipple
NIPPLES/ELEMENT 3M	q.ty	15		510 nr. nipples with dripcup
MEDICATOR + FILTER + WATER METER		YES		

CATEGORY	PRICE
CHAIN FEEDER FLATLINE 476	€ 9,656.91

Warranty: The warranty period for the equipment is 12 months from shipping date. Any electrical part is excluded from the warranty.

Client responsibility (not included in this offer):

- All civil and concrete work.
- Installation of the equipment.
- Commissioning, import duties
- Unloading and transport from harbour to site
- Disposal of all waste materials (including any packaging material).
- Power cables to all devices
- Water and electrical connections to/in the house.
- Erection tools, power and water etc. necessary for the erection of the supplied materials.
- Confirmation costs in case of payment by letter of credit
